- Trulloy.org

Working as intern in this project. For compny project where you need to register to employee and admin to upload Adhar and Pan Card .

Employee Login to open page and welcome page are open to Add task and applileave and leave count And compny transaction and add project and set a goale to this my project

- Urban Services And Trulloy Jobs

In this project you can add your shop details and another people can buy things from this web

Shop owner add things and that all product display in this web.

For use this web user need to register And Than it can buy

product

When any one Add product in cart than generate bill automatically and also order that product. When order is done by user than shop owner can reject or accept order

Shop owner give notification in this web if they want

Many Product can add and remove by owner and if user want to cancel order than he can easily cancel that order
